

# Early Learning in Mississippi

By Jessica Troe July 2016

Mississippi families need access to affordable child care and preschool to support working parents and to ensure that children start kindergarten ready to learn. During the first five years of life, children learn critical skills such as language and socio-emotional regulation, which provide a foundation for lifelong learning.<sup>1</sup> High-quality preschool and child care can support healthy development and enable parents to work. Unfortunately, too many children are left behind by the status quo. In fact, differences in children's cognitive abilities by income are evident at only 9 months old and significantly widen by the time children are age 2.<sup>2</sup> Early learning has positive impacts for children, families, and the economy.<sup>3</sup> It's time to work to put these programs within reach.

## Mississippi families need access to high-quality child care and preschool

Mississippi has 225,628 children under age 6,<sup>4</sup> 68 percent of whom have all available parents in the workforce.<sup>5</sup>

High-quality child care and preschool programs help narrow school readiness gaps, which is particularly important for children of color and those living in low-income families.<sup>6</sup>

## The cost of child care is out of reach for families

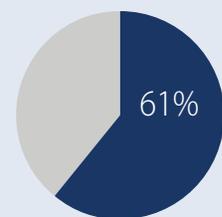

Annual costs at a child care center in Mississippi average \$8,819 for an infant and a 4-year-old,<sup>9</sup> which is 19 percent of the median income for families with children.<sup>10</sup>

For low-income families and people of color, the average cost of child care would constitute the majority of income in most cases.<sup>11</sup>

## The current child care system is failing Mississippi families

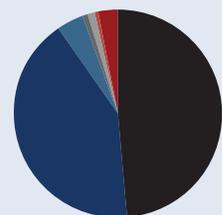

On average, the Child Care and Development Block Grant, or CCDBG, serves only 14 percent of federally eligible children in Mississippi.<sup>12</sup> This results in only 17,800 Mississippi children served through CCDBG funds.<sup>13</sup> Of those served, 90 percent attend licensed or regulated center-based care.<sup>14</sup>

### Children living in low-income families<sup>7</sup>

■ Share of children younger than age 6 living in low-income households

### Race and ethnicity of children younger than age 5<sup>8\*</sup>

49% ■ White  
42% ■ African American  
4% ■ Latino  
1% ■ Asian  
1% ■ American Indian and Alaska Native  
<0.5% ■ Native Hawaiian and Other Pacific Islander  
3% ■ Two or more races

51.5 percent of Mississippi's children under age 5 are children of color.

## Mississippi families need greater access to high-quality preschool programs

The Mississippi Early Learning Collaborative, the state's voluntary preschool program, works with Head Start centers; licensed child care facilities; and public, parochial, or private schools to create Early Learning Collaboratives in the state. This program began implementation in 2014 and serves 4-year-olds in the state. No 3-year-olds are served by state-funded preschool programs.<sup>15</sup> This preschool program meets 10 quality benchmarks set by the National Institute for Early Education Research and spends \$3,762 annually per student.

In Mississippi, 29 percent of 3-year-olds and 37 percent of 4-year-olds are enrolled in a public preschool program.<sup>16</sup>

## Investing in high-quality early learning programs affects economies

Making child care more affordable for families can increase mothers' workforce participation, resulting in a boost to the state's economy.<sup>17</sup>

In Mississippi, if child care costs did not exceed more than 10 percent of a family's income, the state's economy would increase nearly \$2.90 million.<sup>18</sup>

## We can do better for Mississippi families

The Center for American Progress proposes two solutions to put high-quality child care and preschool within reach for Mississippi families and create an early childhood learning continuum for children:

- A new High-Quality Child Care Tax Credit would help families afford high-quality care for their children. This tax credit would benefit an estimated 76,600 children in Mississippi<sup>19</sup> and save families an average of \$2,296 per year on child care costs.<sup>20</sup>
- Voluntary universal preschool for all 3- and 4-year-olds.<sup>21</sup> This would increase access for 45,400 children in Mississippi.<sup>22</sup>

*Jessica Troe is the Policy and Outreach Coordinator for the Early Childhood Policy team at the Center for American Progress.*

**\*Correction, July 19, 2017:** This fact sheet has been updated to clarify that the second pie chart refers to state-specific data.

## Cost of child care as a share of income for people of color<sup>10</sup>

American Indian	N/A
Asian and Pacific Islander	21%
African American	36%
Latino	29%

## Cost of child care as a share of income for low-income families<sup>11</sup>

100 percent of the federal poverty level	36%
150 percent of the federal poverty level	24%
200 percent of the federal poverty level	18%
