

Head Start in Rural Missouri

By Leila Schochet and Rasheed Malik April 12, 2018

Head Start helps fill a critical void in early childhood education and service delivery in Missouri's rural communities. This fact sheet examines the scope of services that the Head Start program provides to Missouri children and families, and highlights the key role that Head Start plays in the state's supply of quality child care.

Child poverty in Missouri's rural counties

Rural children in Missouri are facing significant and persistent poverty. One-third of rural Missouri children under the age of 5 live in poverty, compared with about one-quarter of children living in metropolitan areas. In Missouri, there are 26 rural persistent child poverty counties, where the child poverty rate has been greater than 20 percent since 1980.¹

Family supports in rural counties

At the same time, access to many of the services that help combat child poverty—such as quality child care and health care—is very limited, particularly for low-income rural families in Missouri. Seventy-one percent of rural families live in a child care desert, where the supply of licensed child care does not meet demand.² Eighty-four percent of rural counties in Missouri are designated as a Health Service Professional Shortage Area, where there is a shortage of primary care, dental, or mental health providers.

Head Start in Missouri

- Across rural Missouri, Head Start operates 300 classrooms in 171 centers.
- Head Start funds enrollment for 15,664 children, 35 percent of whom attend rural programs.
- Head Start employs 4,521 staff, 38 percent of whom work in rural programs.

Head Start as a proportion of Missouri's child care centers

Head Start plays an outsized role in filling Missouri's rural child care shortage. In Missouri, Head Start makes up more than one-quarter of the center-based child care programs in rural counties and nearly 40 percent of the center-based programs in frontier counties.³ In contrast, Head Start represents just 13 percent of center-based programs in metropolitan areas.

Head Start health and education service delivery

Head Start delivers health and education services to rural children who may not otherwise have access and makes significant progress in connecting children to these services over the school year.

- 3 Authors' note: Frontier counties are a subset of rural counties and can be understood as the most remote rural counties.

Head Start provides critical family services to Missouri families

Among families enrolled in Head Start, 77 percent of rural families and 81 percent of metropolitan families in Missouri received some type of family service through Head Start. This includes services such as parenting education, health education, job training, and substance abuse prevention.
